

Function and description

- The **SKUGGI**® functions like a side bar. The decisive difference is the uncomplicated handling, because there is no assembly and dismantling.
 - The **SKUGGI**® is simply cranked into the existing awning's inclination, then the rolled up side panel can be lowered, also using a crank.
 - To prevent the fabric from moving in light winds, the covering can be fixed with an additional wind lock*.
- The **SKUGGI**® is mounted on the wall to save space and is
- only 10cm when cranked in. It is easy to use and impresses with its practical use.

* Available as an accessory

SKUGGI®

The ingenious side sun and privacy protection

V2021.01

Passion for shade

SKUGGI®

The **SKUGGI®** is a side sun and privacy screen with a crank mechanism that completely prevents the sun's rays from falling on the side. Depending on the mounting height, this is possible up to a projection of 300cm. The covering of **SKUGGI®** can be unrolled up to 250 cm.

SKUGGI® OPTIONS & ACCESSORIES

- Interchangeable console
- Wind protection with weight
- Protective cover made of weatherproof PVC-coated fabric
- Recess and ceiling console
- Other coverings (e.g. acrylic) on request

Interchangeable console protected from morning and evening sun

With the optionally available interchangeable bracket, you can use **SKUGGI®** on both sides, depending on the sun's position. In the morning you hang **SKUGGI®** on one side and in the evening on the other. Thus, you have perfect glare protection where you need it.

The new frame colours now available in 3 standard colours

- White RAL 9016 (fine structure, HWF, deep matt)
- White aluminium RAL 9006 (fine structure, HWF, micaceous iron ore, deep matt)
- Anthracite grey RAL 7016 (fine structure, HWF, deep matt)
- On request in RAL colour of choice at an extra charge

Covering & fabric colours

With its micro-perforated Soltis cover, **SKUGGI®** offers excellent privacy and sun protection, but remains transparent from the inside out. Available for **SKUGGI®** is a large selection of the most beautiful colours and fabrics.

Cooling effect - provides shade where the awning cannot

Heat protection - keeps the heat under the awning in the evening and in light winds

UV resistance of the colours

Smooth, **easy-care** surface, easy winding

* Other fabrics and colours available at extra cost
